## Shakers

In Recent Years, cocktail and wine bars have sprung up all over the country. They attract a clientele which is as distinctive as that of the traditional public houses, from the checkout girls to the chinless wonders, from the yuppies to the local lads tittering at the thought of a 'long slow comfortable screw'.

Shakers is one of these tropical dream worlds from which emerges a sad reality as observed by four long-suffering waitresses.

We are given a wickedly funny glimpse of this world as over thirty characters, portrayed by four actresses, offer us a fascinating insight into what really lurks behind the plastic palms and Pina Colodas.

In devising the world of Shakers, Jane Thornton and John Godber have created a popular piece of theatre which not only communicates female issues but offers actresses the kind of multi-role playing parts which are few and far between; exciting, physically taxing and above all hilariously funny.

Shakers was developed by the Hull Truck Company through improvisation and experimental techniques and will be of great interest to English and Drama students.
